

Construction sector in the Czech Republic and Slovakia 2010

Market analysis and development
forecasts for 2010-2012

Publication date: February 2010

Languages: English

Word from the Senior Analyst:

After years of continuous growth, the construction industry in the Czech Republic and Slovakia entered a period of downturn provoked by the global economic crisis, which led to the shortage of liquidity and a substantial reduction in property development activity. Slovak construction industry experienced a stronger contraction last year than it was seen in the Czech Republic, base effects will therefore be more pronounced in Slovakia, which may expect a 4% growth in construction output. The Czech construction sector, which shrank only slightly last year, will remain subdued in 2010 and possibly also in H1 2011, with a recovery expected only in 2012.

Robert Obetkon, Senior Construction Market Analyst

About the report:

Construction sector in the Czech Republic and Slovakia 2010 is a comprehensive report providing the latest news, statistical data and business intelligence available. It includes macroeconomic, financial and industry specific details necessary to plan for business expansion and/or investment that yields maximum result. The report expounds on and analyzes data using a three-pronged treatment of the three major market segments by project orientation: **civil engineering, non-residential and residential construction.**

The report includes profiles of top market performers and studies their strategies for success and provides reliable forecasts until 2012.

If you are looking for:
