

# Power sector construction in Poland 2010

Development forecasts  
and planned investments

---

Publication date: February 2010

Language: Polish, English

## Word from the author:

Because of long-term underinvestment, over the next 10-15 years the Polish energy sector will have to battle with a real need for capital expenditure of € 50 bn. The Polish energy sector is the sixth largest in the European Union in terms of total output of electric power. The high rate of capacity utilization and forecasts of further growth in demand for electricity together with the need to shutdown outdated power units, make it imperative that new generation capacity be constructed and the national transmission and distribution system be expanded – representing one of the key tasks before the Polish energy sector today.

**Bartłomiej Sosna**, Senior construction analyst

## Report Description:

**Power sector construction in Poland 2010** is a groundbreaking first edition report compiled by PMR's construction market experts. It examines Poland's changing electricity market, existing facilities producing electricity for the needs of the country and the region, and the plans of leading power groups in terms of construction of new facilities geared toward meeting the energy requirements of the coming decades.

This report profiles the leading power groups in detail, and describes the companies and their reach, the power stations they currently own and operate as well as their plans for the future – including levels and specific targets for investment. Planned investments are detailed and separated into conventional power plant projects and the wide open renewable power production field that can encompass wind, water, geothermal and biomass generation facilities.

## If you are looking for:

- Poland's electricity market – its key drivers, assets and players
- The conventional power segment – planned investment in new plants and renovations
- Renewable power sources – plans for new plants to operate in this wide open segment
- Top groups producing and selling electricity – and their plans for the future
- Active contractors on the market – details on their completed projects, earnings and subsidiary structures

...this report is for you!
